

TWISP - FARM TOUR MEDICINAL AGROFORESTRY SYSTEM

APRIL 10TH, SATURDAY - 1:00 - 4:00PM

250 Twisp River Road. Twisp, WA 98856

Next door to the Channing Brothers Farm. Please carpool if possible to reduce parking needs.

Tour a 25-year old, 2-acre Medicinal Agroforestry Planting with Michael Pilarski. Michael lived up the Twisp River valley from 1996 to 2005 and planted and tended this medicinal agroforestry system. Around 3,000 shrubs and trees were planted as well as many herbs. The planting was sold to Ancestree Herbals who tended it till recently. It is interesting to see how the various species have fared over the years and how an understory has developed.

A small herbal cooperative is coming together to tend the site and increase its productivity. Interested people should attend. This also offers an opportunity for the permaculture-inclined community to get together and chat.
